SUMMARY

Experienced **Software Engineer** skilled in building web applications using **Node.js, React.js, and SQL**. Expert in designing server logic, optimizing databases, and developing user-focused solutions. Certified in **Microsoft Azure Data Fundamentals**, aiming to advance as a **Data Engineer** with a focus on cloud data solutions. Proven success in enhancing CRM systems and pioneering logistics applications. Eager to apply cutting-edge technologies to deliver top-quality software in dynamic settings.

EXPERIENCE

Prashi Solution — Software Engineer

02/2023 - PRESENT, Ahmedabad

- **Web Application Development**: Designed and implemented responsive, cross-browser web applications using React.js and MUI library, achieving a 98% user accessibility score.
- **Server-Side Logic & APIs**: Developed robust server-side logic and secure RESTful APIs using Node.js and Express.js, ensuring system reliability and scalability.
- **Database Management**: Designed and managed relational databases, including creating and optimizing tables, stored procedures, and relationships between tables to ensure data integrity and efficient querying.
- **CRM Software Enhancement**: Enhanced CRM features using React.js, Node.js and SQl, improving customer engagement by 25% and data accuracy by 30% through seamless integrations.
- **Logistics Application Development**: Developed a logistics application using React.js for the frontend and Node.js for APIs and server-side logic. Designed relational databases with optimized tables and stored procedures, streamlining intracity services and improving delivery efficiency by 20%
